How to load Speakers Presets inside DA Series amps?

--

DA Series Amplifiers (DA8, DA12, DA8AES, DA12AES)

Prerequisites: The APG DA Series amplifiers & APG Speaker's Preset Bank must be installed on ArmoniaPlus 2.4 before continue.

Please follow this steps in order to load Speaker's Presets inside the On-board memory of the DA Series amplifiers:

- Connect your APG DA Series amplifier to your computer with an Ethernet cable and turn it on.
- Open ArmoniaPlus 2.4; Open a "Live Session".
- Click on the "Synchonization button" At and turn the synchronization "On". The icon must be green: At. (Now all the changes made inside the ArmoniaPlus session will affect the connected amplifiers on the network).
- Click on "Match" and "Discovery" and drag & drop your amplifier to the Workspace.

- Then click on the "Home button" to go back to the Workspace main view.
- Click on the A+ menu, then click on "More/ Preset Manager".
